Editorial

Our college magazine SPARK is a mirror that reflects the feelings, experiences and milestones achieved throughout the academic year by the students and the teachers. It gives me immense pleasure to compile everything together as finally SPARK reveals the identity of our institution.

This year's theme of SPARK is 'Experiences'. Experiences shape every moment of our life. We encounter experiences daily. But what we do with these experiences actually makes us the real 'us'. The positive experiences charge us, energize us and take us ahead in life. They motivate us to grow and evolve. We need to learn from the negative or bad experiences we have in life and keep moving ahead with a positive attitude. We can use these so-called 'bad experiences' to shape our future and achieve success.

To make the most of all your daily experiences I would like to share my insights with you all-

- ♦ Be a proactive learner – Learn from your classroom experiences.
- ♦ Don't be afraid to push your comfort zone, try new things and be motivated to do things creatively. It's alright if things are not always perfect... but try to be innovative. You will learn from your experiences when you go wrong.
- ♦ Connect with people from a spectrum of diverse educational and cultural backgrounds and gain rich experiences which will help you to cater to the diverse needs of your students.
- ♦ Enrich your life by getting involved in all the activities that you can pursue in and outside the classroom. This will teach you valuable lessons and skills that you would otherwise never had the opportunity to challenge and hone if you would be holed only to learning & teaching the theory papers.
- ♦ When you take up a job, grab opportunities to explore and immerse yourself in a new culture, witness first-hand the impact of your work among the students. This will broaden your perspective on learning and you will see the practical value of your education.

This annual magazine highlights the academic as well as co-curricular experiences that all of us- students and staff have received in the B.Ed. course in the academic year 2017-18. It is both interesting and informative. Hope you enjoy reading it!!

Dr. Bhavna Dave
